The figure consists of three histograms arranged in a 2x2 grid, with the bottom-right cell empty. Each histogram shows the distribution of tau lifetimes for a specific decay channel. The x-axis for each plot is labeled with the decay channel name, and the y-axis represents frequency. A prominent blue peak is visible in each plot, and several orange vertical lines are overlaid on the distributions.

- Top-left plot:** The x-axis is labeled "Tau BCZ" and ranges from 1400 to 3000. The blue peak is centered around 2800.
- Top-right plot:** The x-axis is labeled "Tau Hell" and ranges from 300 to 1000. The blue peak is centered around 520.
- Bottom plot:** The x-axis is labeled "Tau H and Hel" and ranges from 0 to 800. The blue peak is centered around 200.
